TO BE WITNESS

We can Be a witness. Watcher and witness both are different things, Watcher is something like to do intentionally. We do watch energetically, while we don't need any energy to Be witness, being a witness is a very neutral thing, we do not need any energy to be witness, Witness is a very internal thing, and to be watcher is very outer thing. In the court when a witness gives testimony, One does not need any energy… its a phenomenon, when the incident happened…One was over there, so the One is just witness, One were not involved in the incident. a witness can not be a reason for the incident, if you are watcher you will have to need energy to think, to judge, to observe, these are all the activities, and activity happens when One involves in it, and the activities are not phenomena, to think, to judge and to observe these are works, and work needs energy, so the watcher is tied with karma, and witness is neutral. So how can we be witness…No one can be witness, we already are witness, but we aren't concious. but we do not have to practice conciousness, conciousness is a secondary thing after the witness. so the real question is how to know that we are already a witness. It can happen now, at this moment if you are simple to believe it, but it would not happen until you are Be empty from all the answers you have. We all have lots of answers about life in the form of Knowledge. If you think a while you will come up with the answer of how you can be witness…. That answer will be in form of perception, and the perception is not the answer, The answer is "wordless" The Ultimate Answer is beyond the questions, basically, all the answers are the productivity of all the questions, We can go towards "The answer"….towards "The wordless" taking sankalp. "The Wordless" is "The Answer" himself, "That" is Unspoken….Unknown.
